Education

B.Sc. in Computer and Control Engineering

Faculty of Engineering, Tanta University, Egypt

Sep 2020 – Jul 2025

Grade: Very Good (80%)

Skills

Languages: JavaScript, Java, Python, C++, HTML/CSS

Databases: PostgreSQL, MongoDB

Frameworks: Node.js, Spring

Tools & Technologies: Git, Docker

Projects

E-commerce Web Application —  | In progress

Tech Stack: Node.js, Express.js, React, MongoDB, Mongoose, JWT, Zod

- Developing a full-stack e-commerce app with separate customer and administrative functionality.
- Implemented JWT auth, email verification, password recovery, request validation, and centralized error handling.
- Built a multi-provider email service with fallback support and integrated Cloudinary-based asset uploads.
- Added structured logging, reusable slug and SKU utilities, rate limiting, sanitization, CORS, compression, etc.
- Developing Frontend using vite coding.

Phone Store Management System —  | 

Tech Stack: Node.js, Express.js, React, SQLite, JWT, Mantine, Vitest, Supertest

- Built a full-stack, offline-friendly system for managing inventory, sales, purchases, returns, expenses, and digital services.
- Implemented role-based access control with configurable permissions for individual staff members.
- Developed stock and profit tracking, low-stock alerts, barcode lookup, dashboard analytics, CSV exports, and scheduled backups.
- Created a bilingual Arabic–English interface with RTL support and light and dark themes.

Medical Appointment Management Platform — 

Tech Stack: Spring Boot, Flask, REST APIs, MongoDB, PostgreSQL

- Contributed to a microservices-based healthcare platform for managing appointments and doctor–patient communication.
- Integrated AI services for detecting and classifying diseases from X-ray images.
- Developed the Inbox microservice for managing conversations and messages between users.
- Contributed to the Doctor microservice, including doctor profiles and related operations.
- Collaborated with team members across backend and AI services to integrate the platform’s components.

Python Tools & Automation — 

Tech Stack: Python, Tkinter, Selenium, Playwright, Scrapy

- Built several python apps, including web scrapers, tools, and simple games.
- Apps like YouTube downloader, web scraper for jobs, typing speed, etc.
